

# Day 5 housekeeping

# Post-workshop survey

- We are putting together the questions
- **Please fill it out!** Check your email and Whatsapp.
- Two purposes:
  - 1) To help us improve content for future workshops
  - 2) To help acquire funding for future workshops

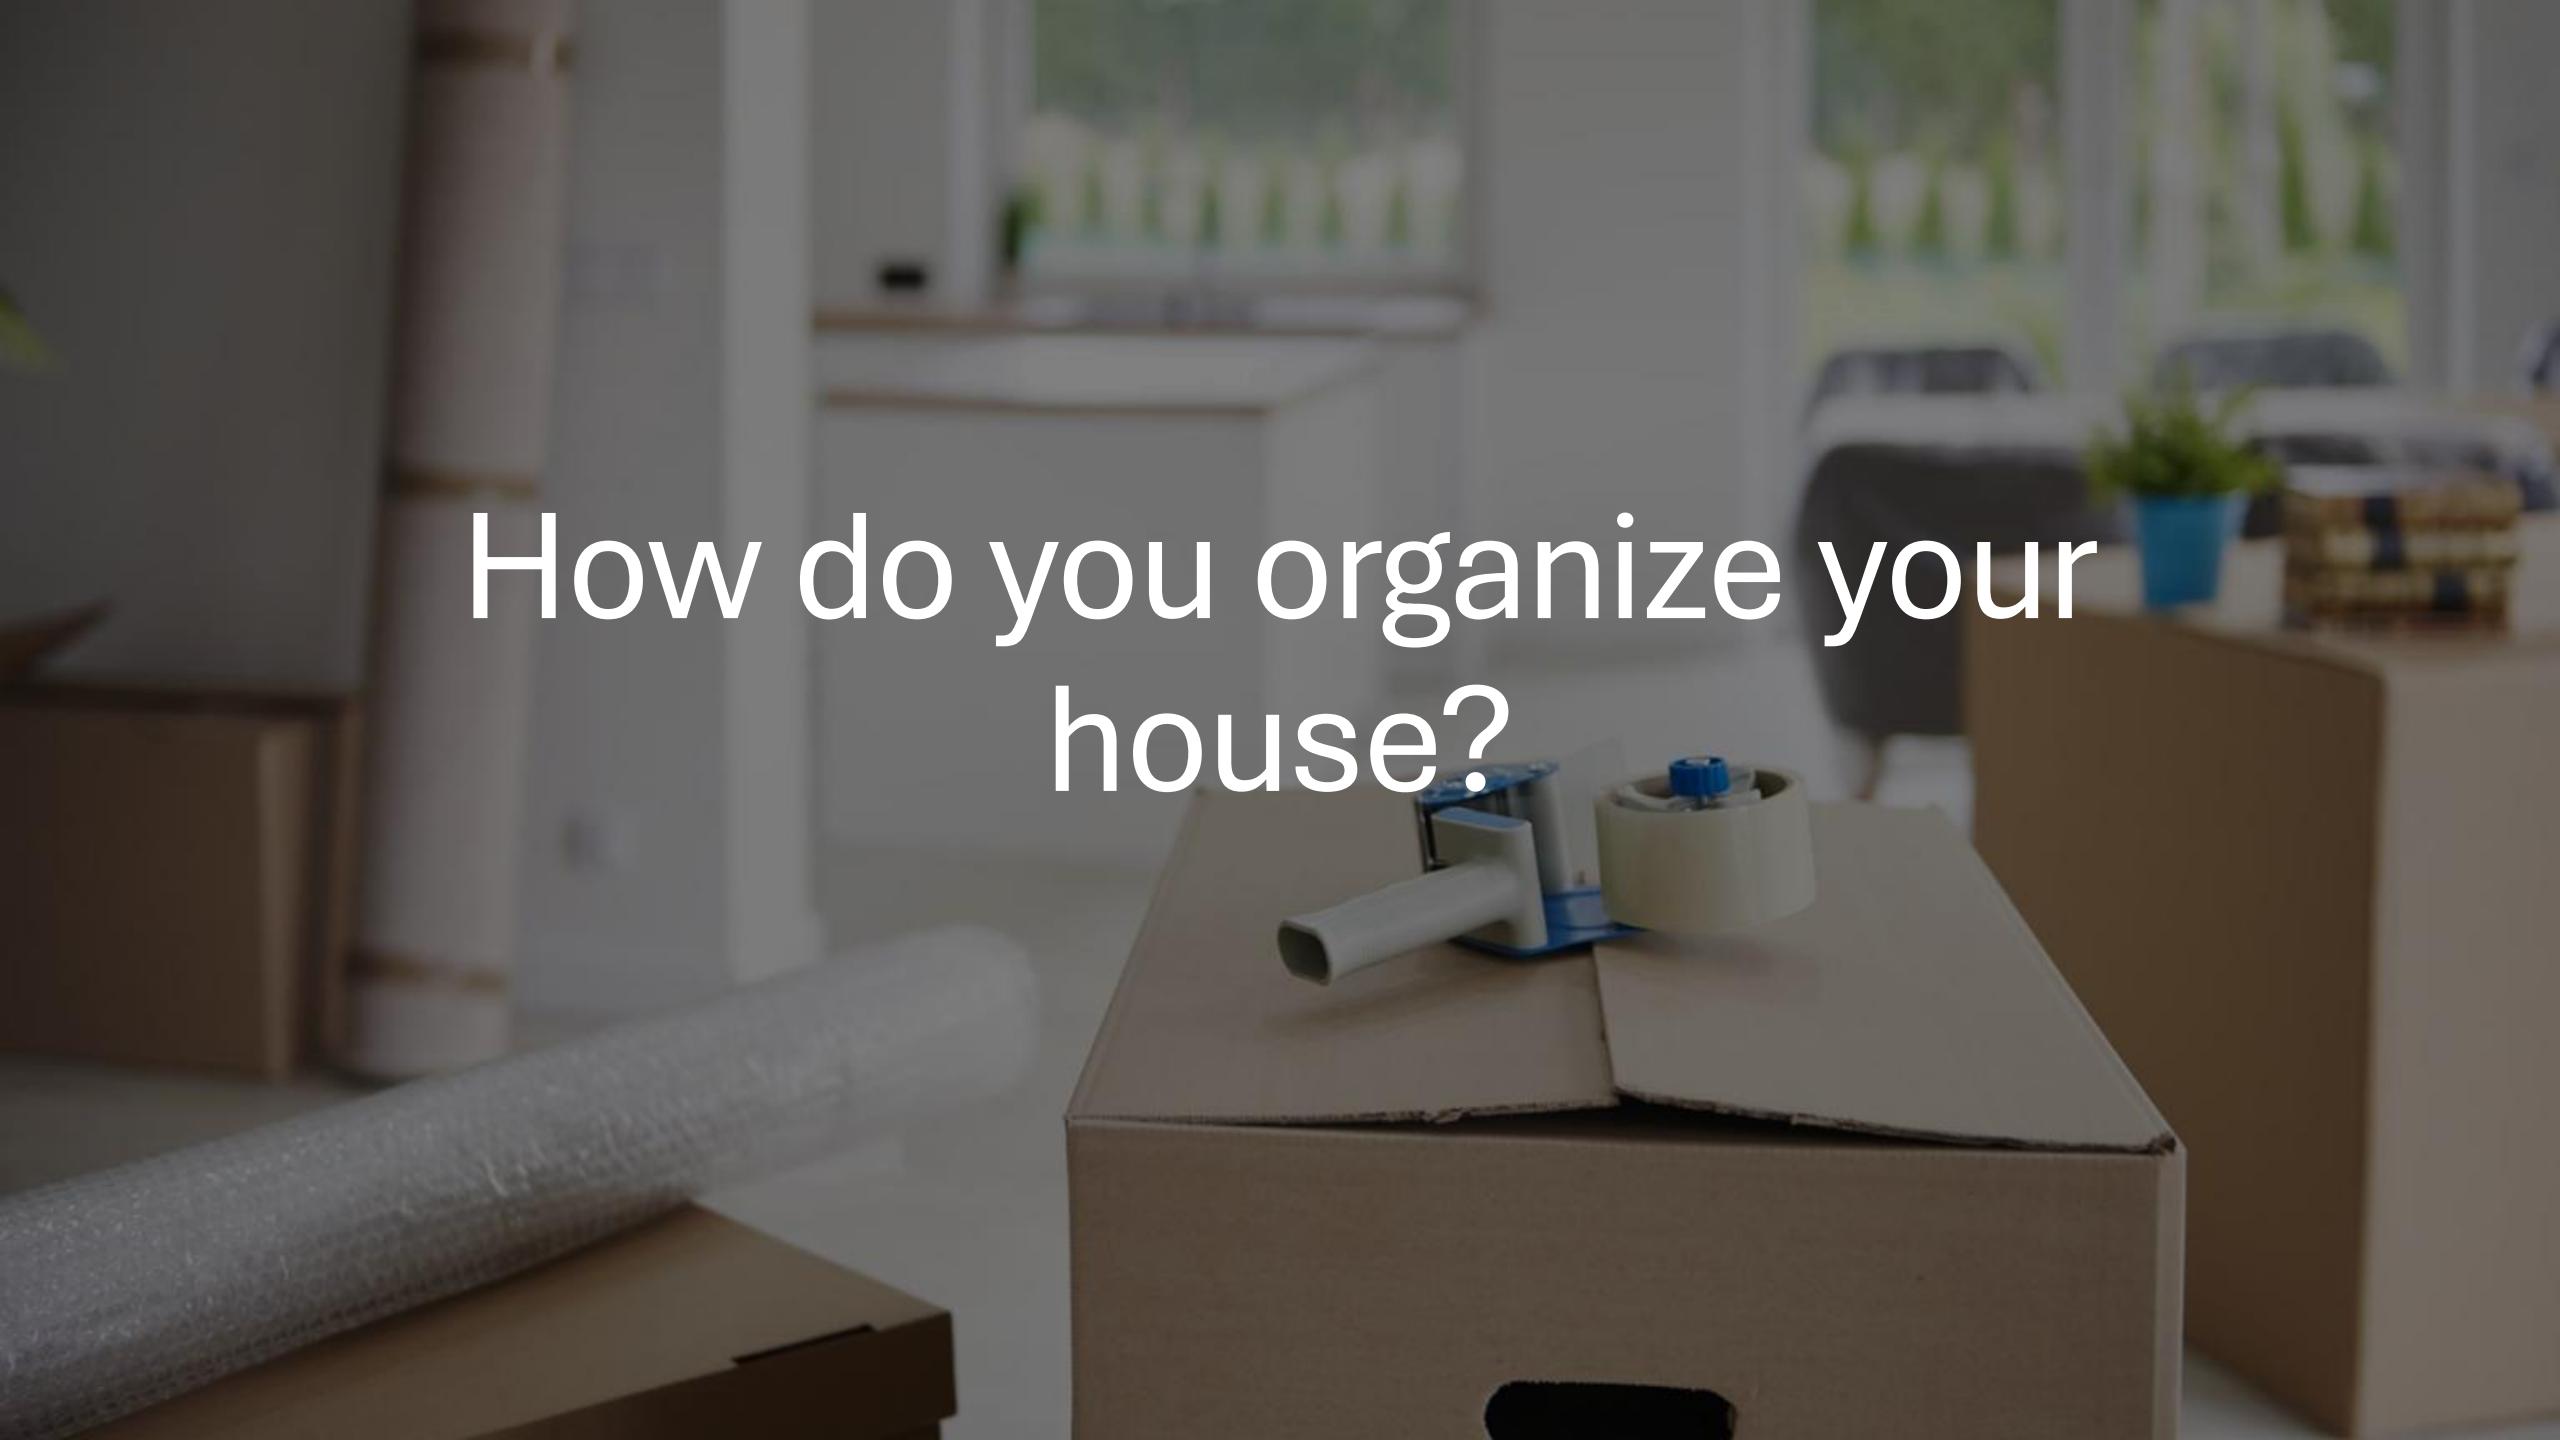

# The rest of today:

- Complete your group project analysis and presentations
- Give your group presentations (~15 min per group).
- Evening Banquet with our distinguished guests

# Keeping organized

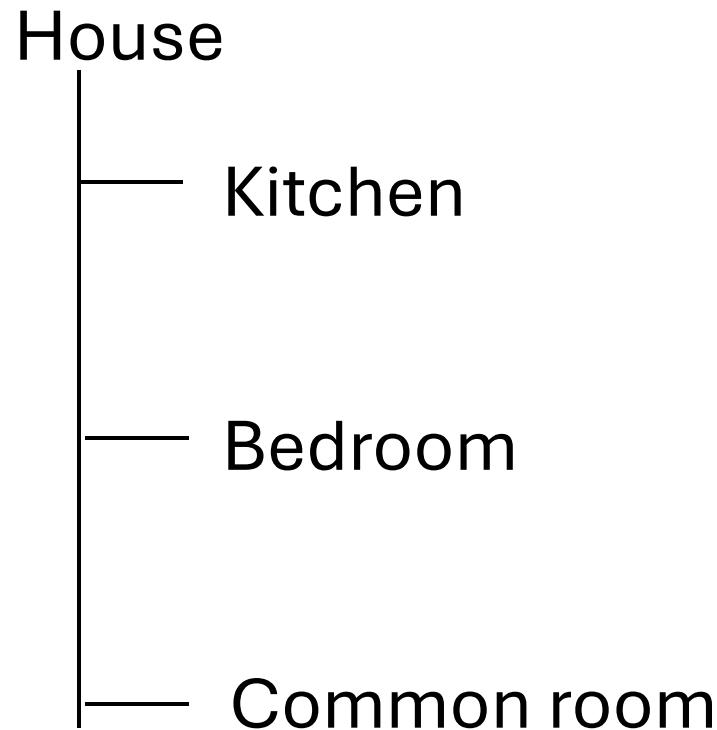

# File organization is a barrier to computational data analysis

- To analyze data in R, you need to tell R where the data “live”
- In a data analysis project, you will use and create many files (including many generated in R).
- Having a system for organizing your files **AT THE BEGINNING** will make your life easier.

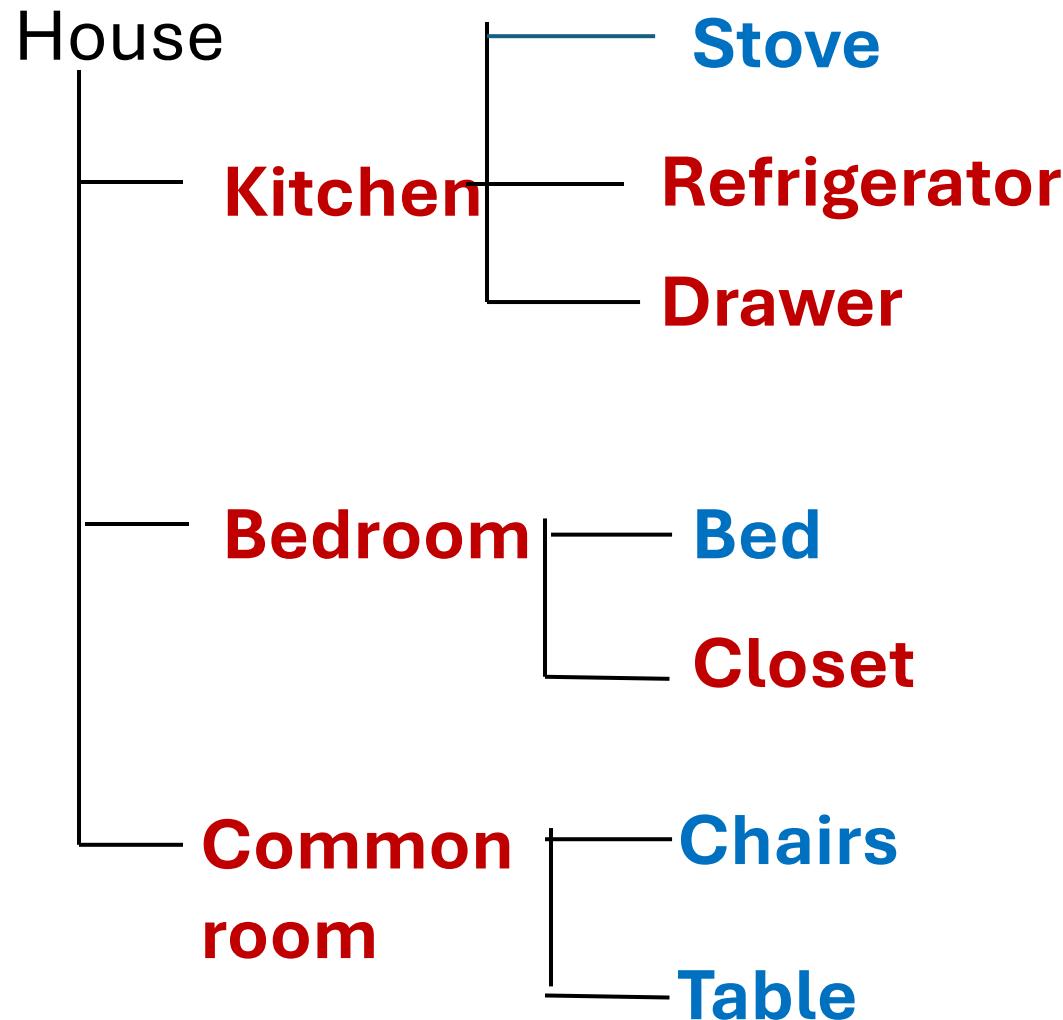

How do you organize your house?

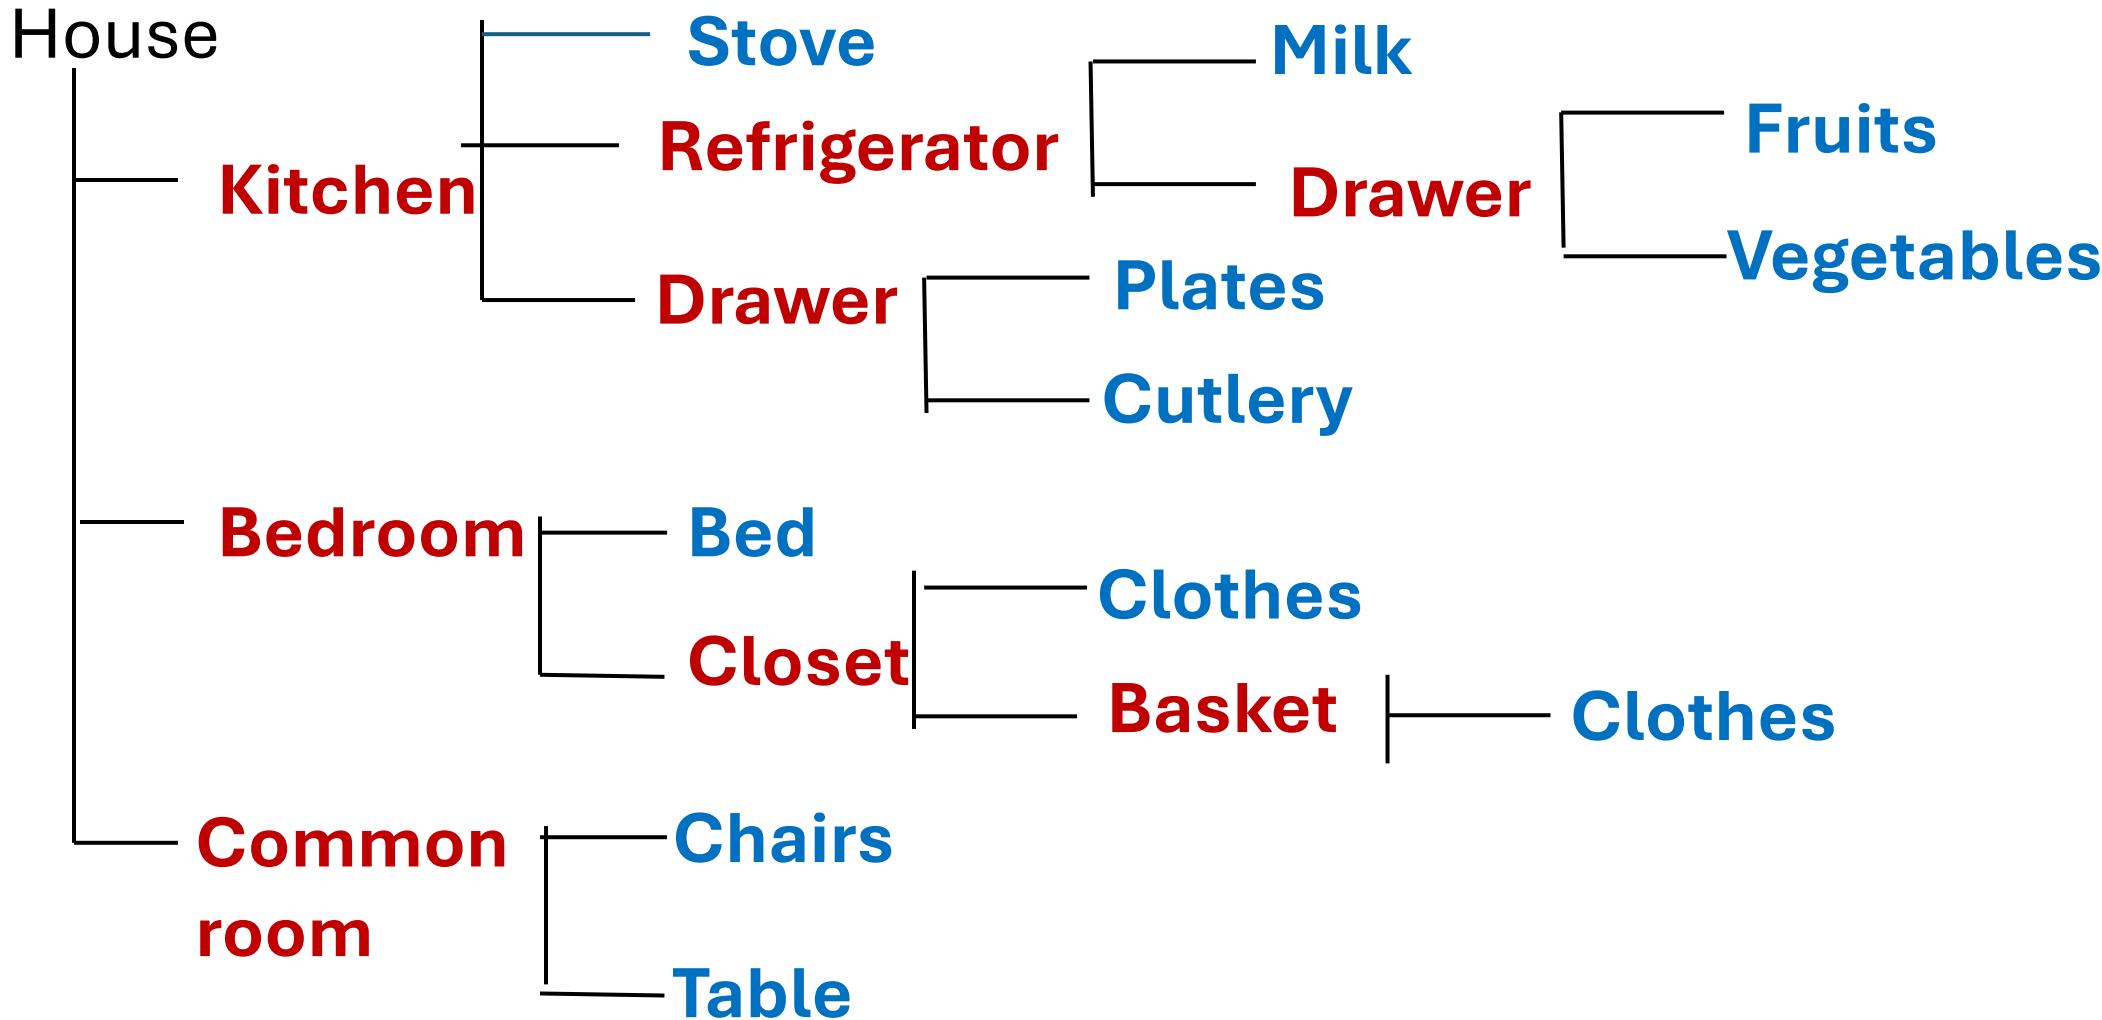

# Your house has rooms for different purposes

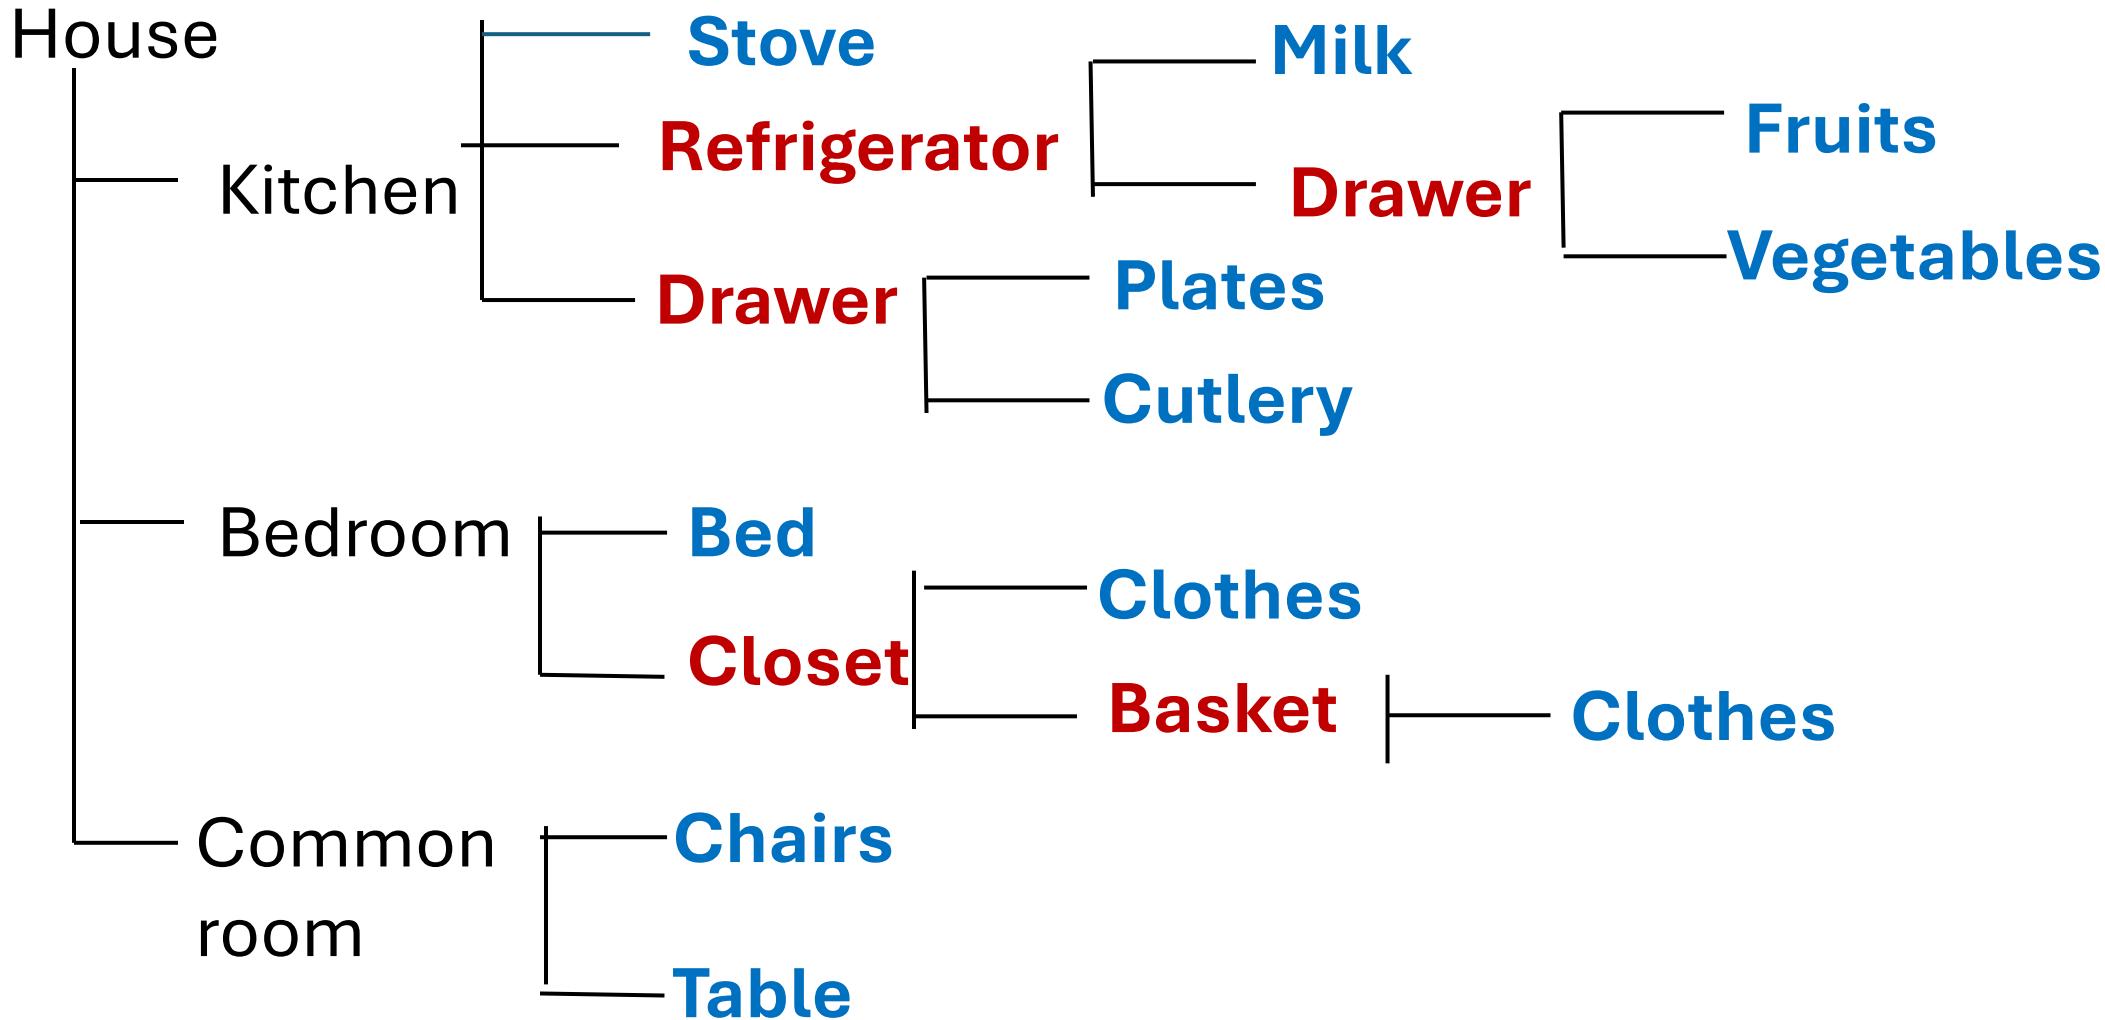

# Each room has **objects** and **compartments**

Those compartments have objects and **compartments**

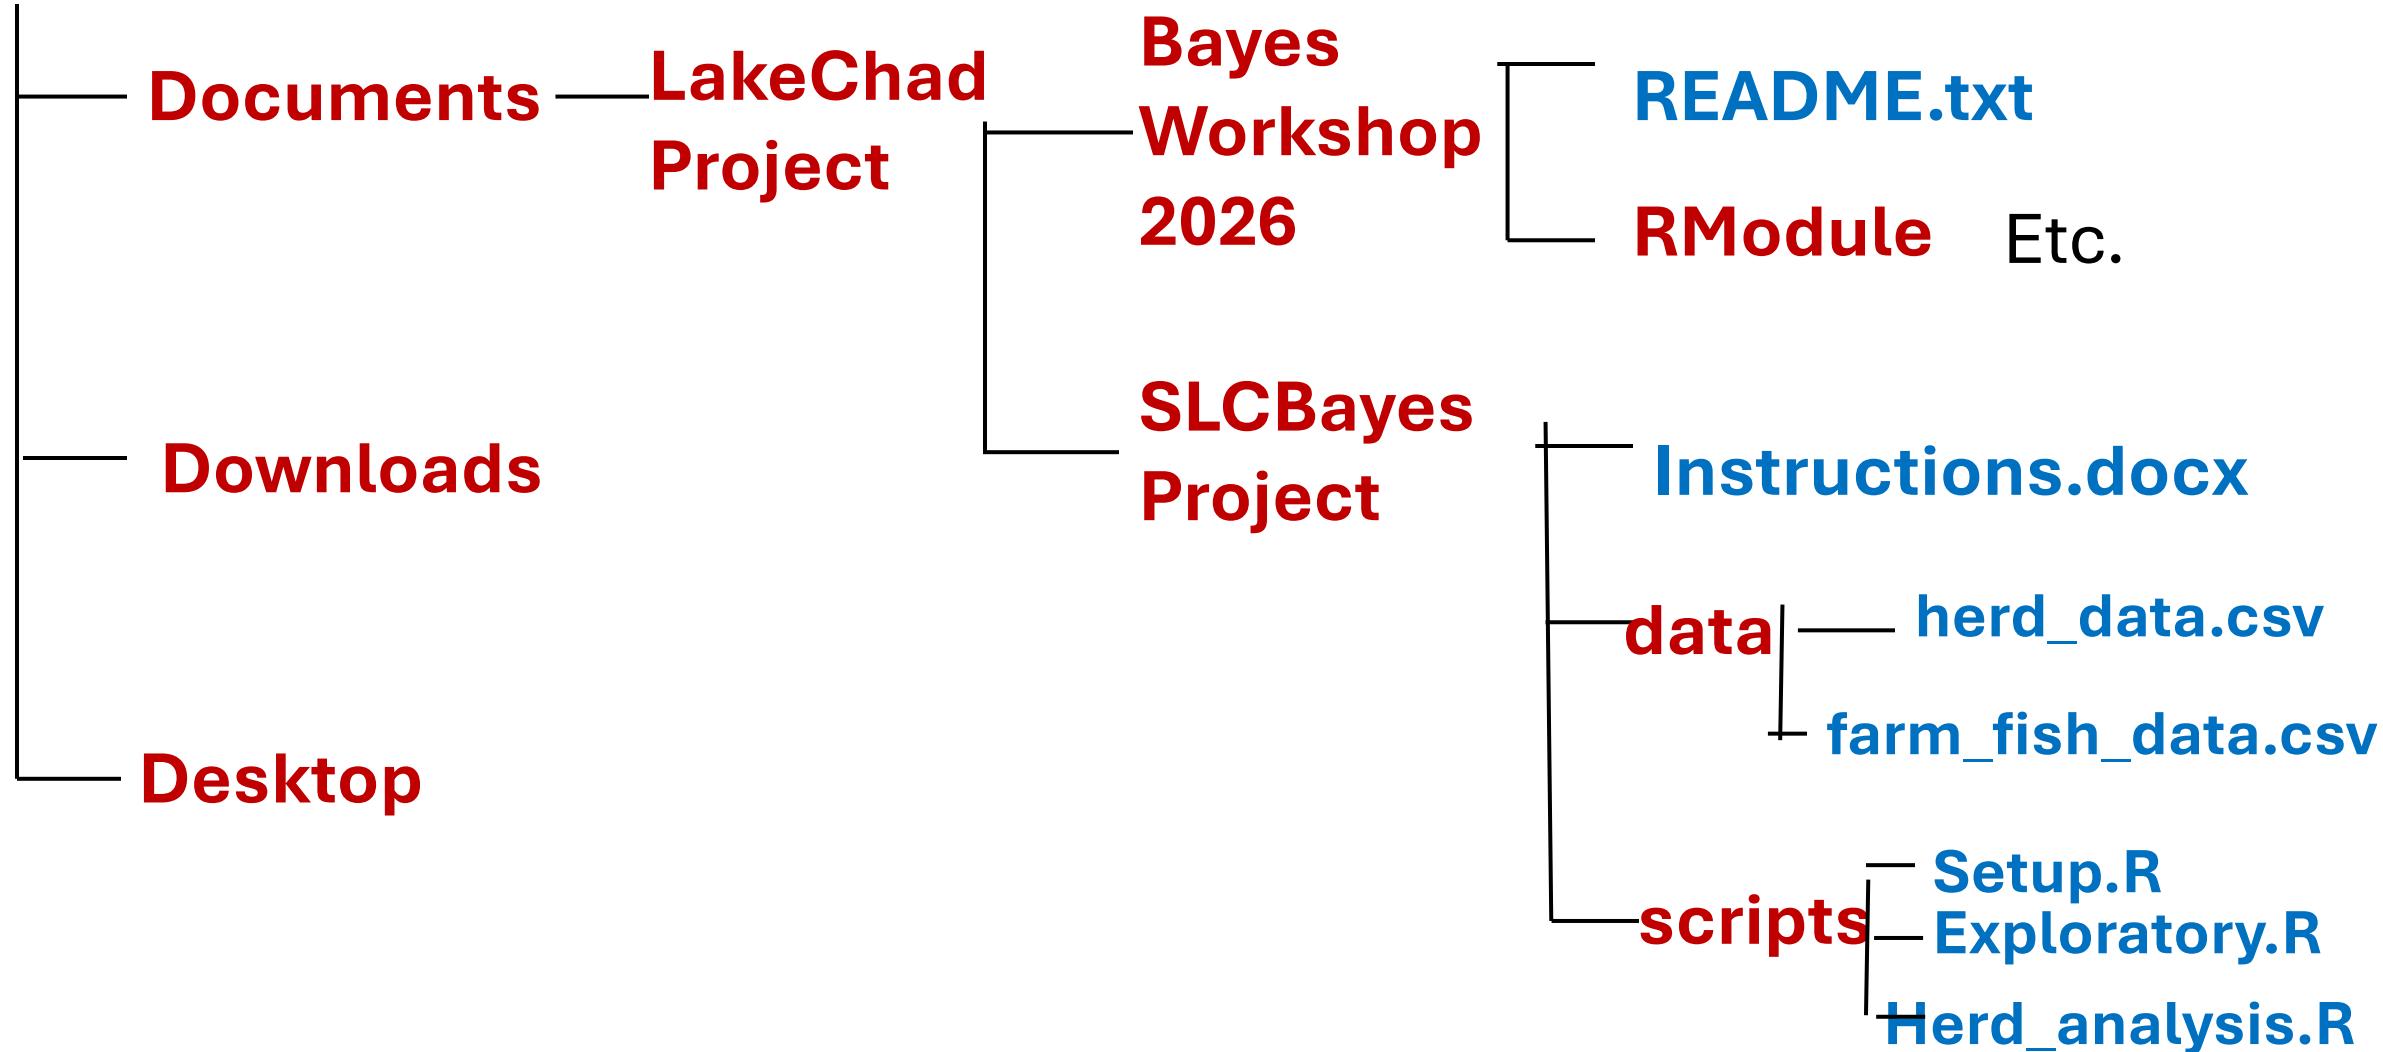

# Organize the files in your computer like the objects in your house

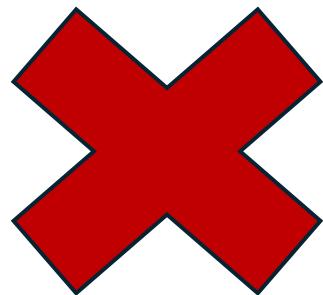

# Organize the files in your computer like the objects in your house

Your computer hard drive

# Use informative file and folder names

**Analysis.R**

**SLCherdAnalysisv01.R**

# Add documentation as you go
